

GOLF

REVOLUTIONARY LENSES

Our bespoke ImpactX 2 lenses are made with superior optics polymers to combine optical clarity, lightweight and incredible impact resistance. Our golf glasses feature lenses with a specific shape to increase the field of view and increase accuracy.

GOLF IMPACTX 2 LASER PURPLE HDR

We have enriched our revolutionary ImpactX Photochromic optics with a cutting-edge and beautiful lens specifically tailored to elevate golfers performance. Benefiting from the most advanced photochromic technology and a luminous transmittance getting dark from 48% to 8% according to the day, the brand new ImpactX 2 Laser Purple blends state-of-the-art light management with ultra defined contrast and enhanced depth perception allowing to better gauge distance and changing grass conditions

COLOR ENHANCEMENT

The ImpactX 2 Laser purple lenses are specifically fine tuned to experience colors like never before. The HDR filter takes visual performance and comfort to a higher level by reducing the intensity of light without taking away natural hues. By attenuating the light for specific colors, the HDR filter enhance color perception for the colors that matter for the golf.

FACE EVERY LIGHT CONDITIONS

While playing golf, weather conditions can change and photochromic sun lenses just adapt to light variations. Our ImpactX 2 Laser Purple photochromic lenses feature fast activation and fading speed a large photochromic range (from 48% to 8%) and extreme durability with long term resistance to UVA and UVB radiations.
